

Mailit 11 Revision History

This document contains details regarding improvements of the Mailit 11 FileMaker plug-in.

15.10.2026 - Mailit version 11.0.4.8 for Windows / macOS X / Linux

- Fixed: Some plugin functions did not work correctly with shared Outlook mailboxes via the REST API (Graph). This has been fixed.
- Fixed: After completing OAuth web authentication in an external browser, the FileMaker script was not triggered. This affected Outlook and corporate mailboxes. Fixed in the file ../Mailit Assets/oauth/index.html.
- Several fixes in the example file Personal Mail.fmp12.
- Fixed: The Email_ImapListFoldersAttributes function for Graph returned localized folder names instead of the standard English folder names. This has been fixed.

10.09.2026 - Mailit version 11.0.3.6 for Windows / macOS X / Linux

- Fixed: When opening the file selection dialog, focus was lost and it was possible to switch to another window. This has been fixed.
- Fixed: OAuth authentication issue with the outlook.com POP server. This has been fixed.
- Fixed: After disconnecting, the download history file was not returned for the POP protocol. This has been fixed.

11.06.2026 - Mailit version 11.0.1.3 for Windows / macOS X / Linux

- Initial release
